

#12 Flower Bulb 'Dibble, Dibbler, or Dibber

A dibber, dibble, or dibbler is a pointed wooden stick or rod for making holes in the ground so that seeds, seedlings or small bulbs can be planted. Dibbles come in a variety of designs and the design often determines the use the dibble will have. This dibble is for planting flower bulbs. It is thick with a blunt end allowing for a wide hole with a flat bottom in which to set the bulb. Many also have depth marks on them, though this one is without marks.
