

Ohio Timber Harvest Planning Program

Ohio Department of Natural Resources,
Division of Forestry

In cooperation with
Ohio's Soil & Water Conservation Districts

Program Purpose: This voluntary program is designed to assist woodland landowners, loggers, and foresters with the pre-planning of logging activity. The program is designed to help the responsible parties select Best Management Practices (BMPs) that will reduce soil erosion and maintain the harvest site to state standards found in the Forestry Pollution Abatement Rules and Standards (Ohio Administrative Code 1501:3-12-01 to 1501:3-12-06).

Timber Harvest Notice of Intent (NOI) (For Voluntary Submittal)

Landowner Name(s): _____
Mailing Address: _____

Telephone No.: _____ **Cell No:** _____
E-mail Address: _____
 Is the property to be harvested enrolled in the Ohio Forest Tax Law Program? Yes No

Logging Company Name: _____
Mailing Address: _____

Contact Person: _____
Telephone No.: _____ **Cell No:** _____
E-mail Address: _____
 Certified Master Logging Company? Yes No
 Has logger attended BMP training within last 5 years? Yes No

Forester Name(s): _____
Company or Organization Name: _____
Mailing Address: _____

Telephone No.: _____ **Cell No:** _____
E-mail Address: _____

Name of individual submitting the NOI: _____

Implementation Schedule:
 Number of Acres to be Harvested: _____
 Number of Stream Crossings Needed: _____
 Proposed Starting Date: _____
 Proposed Completion Date: _____

Location of logging operation:
 County: _____ Township: _____ Section: _____
 Name of public road where haul road/landing is located: _____
 Latitude & Longitude of site/job entrance (Optional, indicate if known): _____ ° W _____ ° N

Timber Harvest NOI

If you wish to file a "**Timber Harvest Notice of Intent (NOD)**," complete only pg. 1 of this document and submit the **entire** document to the Soil & Water Conservation District (SWCD) in the County where logging is to occur or to the Ohio DNR Division of Forestry.

The Timber Harvest NOI form serves only as a voluntary notification and **Does Not** provide affirmative defense in the case of a Civil Suit as described in the Ohio Administrative Code (OAC), rule 1501:3-12-05.

Timber Harvest Plan

If you wish to file a complete "**Timber Harvest Plan**" for approval by the local SWCD or the Ohio DNR Division of Forestry, please complete all 4 pages of this document and return the entire, completed document to the SWCD in the county where logging is to occur.

***Note: Any person owning or responsible for a forestry operation who is managing such an operation in accordance with a "Timber Harvest Plan" currently approved by the SWCD or ODNR Division of Forestry shall be considered in compliance with the state rules for forestry pollution abatement.**

In a private civil action for nuisances involving forestry pollution, it is an affirmative defense if the person owning, operating, or otherwise responsible for a silvicultural operation is operating under and in substantial compliance with an approved Timber Harvest Plan.

Guidance for completing the "Timber Harvest Plan"

The Timber Harvest Plan is based on the guidelines found in the book "**BMPs for Erosion Control for Logging Practices in Ohio.**" The management practices detailed in the book form the standards used to determine compliance with Ohio's Forestry Pollution Abatement Rules and Standards. For your convenience, chapter and page number references are provided on the Timber Harvest Plan form. By referring to these pages, you can see photos and/or diagrams as well as written descriptions of the recommended BMPs. To obtain a copy of the BMP book, please contact the local SWCD, the Ohio Department of Natural Resources Division of Forestry at (877) 247-8733 or go online at <http://ohioline.osu.edu/b916/index.html>.

Timber Harvest Plan**A. Nature and scope of logging activity**

Acreage of operation: _____Acres

- Harvest type: Thinning
 Timber Stand Improvement (TSI)
 Clear-cut
 Shelterwood cut
 Selection cut - (single tree or group)
 Diameter limit
 Other: (Please specify): _____

Type of harvesting system to be utilized:

Manual (Chainsaw felling and skidder):

- Rubber tire skidder with Grapple Cable
 Tracked skidder/dozer

Mechanized:

- Cut to length (harvester/forwarder)
 Feller-buncher w/ rubber tire skidder Grapple Cable
 Feller-buncher w/ tracked skidder Grapple Cable

Other:

- Horse skidding Farm tractor skidding Farm tractor w/ forwarding trailer

B. Maps

All Timber Harvest Plans submitted **must** include a complete and legible plan map. Attach a copy of a U. S. Geological Survey (USGS) topographic map and/or a USDA-Natural Resources Conservation Service soils map that encompasses the proposed logging site. On the map, indicate the following: Proposed road systems (haul and skid roads), stream crossings, log loading area(s), property boundaries, and the boundaries of the logging operation. (**Note:** If you need assistance in obtaining or completing map(s), contact the local SWCD office)

C. Watershed information

Indicate the name of the nearest river or stream that the logging site drains to.
(Example: Unnamed tributary flowing to Salt Creek):

D. Best Management Practices

Check Yes or No; If No, explain the proposed alternative to be used or why the BMP is not applicable.

Yes No 1. Leave a filter strip between perennial streams and roads, landings, etc. (Sect. VII, pgs. 46-48).

Explain alternative:

Yes No 2. Construct skid trails at grades of 20% or less. (Sec. IV, pg. 29. **Explain alternative:**

Yes No 3. Haul road entrances will be graveled up to 200' from the public highway when necessary to reduce mud on the road.
(Sec. III, pg. 28). **Explain alternative:**

Yes No 4. Log landings will be constructed as small as practical, be adequately drained and constructed outside of any filter strips.
(Sec. II, pg. 7). **Explain alternative:**

Yes No 5. Put dips in all approach roads and skid trails that are upslope of landings to prevent water from running onto the landing
Sec. II, pg. 7). **Explain alternative:**

Yes No 6. When roads cannot be out-sloped, ditch water off the road and use properly sized culverts at intervals specified in the
BMP handbook. (Sec. III, pgs. 17-25). **Explain alternative:**

Yes No 7. On non-ditched roads, use broad-based dips and/or grade breaks at intervals specified in the BMP handbook. (Sec. III,
pgs. 19-20). **Explain alternatives:**

Yes No 8. Temporary water bars or turn-outs will be placed on skid trails to control potential erosion during any temporary
shutdown periods. (Sec. IV, pgs. 31-35). **Explain alternative:**

Yes No 9. Permanent water bars will be installed at specific intervals as described in the BMP handbook. (Sec. IV, pgs. 31- 35 and
Sec. VIII, pgs. 49-50). **Explain alternative:**

Yes No 10. Stream crossings for Haul and Skid roads shall be avoided when possible. (Sec. VI, pgs. 37-45).

- Streams should be crossed at right angles (90°). Divert water from road prior to the crossing with a water diversion device or break in grade.
- Portable bridges will be used when practical, and culverts used when necessary.
- Streams to be forded shall have banks and stream bottom armored.
- All stream crossings shall be restored.

Explain alternative:

Yes No 11. Logging slash greater than 6" diameter shall be removed from the channel of perennial streams as identified on U.S.G.S. 7.5 minute quadrangles. Slash shall be pulled back from channel and bank. (Sec. VII, pg. 47). **Explain alternative:**

Yes No 12. Harvest (sale) closeout procedures shall be completed. (Sec. VIII, pgs. 49-57).

Water bars will be built on skid trails and haul roads that will not have vehicular traffic. The following areas will be seeded and mulched using the liming, fertilization, seeding, and mulching guidelines found in the BMP handbook: landings, roads within filter strips, stream crossings, haul roads, and skid trails. Indicate the seed mixture that will be used:

Yes No 13. All trash, such as used oil filters, equipment, parts, and other items will be removed from the harvest site. (Sec. II, pg. 7). **Explain alternative:**

E. Signatures of Responsible Parties

I am aware of the erosion control requirements of Ohio's Forestry Pollution Abatement Rules and Standards. I agree to conduct all logging activities on this site in a manner that will reduce the potential for damage to waters of the state and maintain compliance with all state laws. I grant ODNR and SWCD staff permission to ingress and egress on the land subject to this plan.

Landowner Signature: _____ (Date)

Logger Signature: _____ (Date)

Forester Signature: _____ (Date)

Date that the Timber Harvest Plan was received by the SWCD or ODNR: _____

Review & Approval:

Form reviewed by: _____ (SWCD or ODNR Representative) (Date)

Site review conducted by the staff from _____ SWCD _____ ODNR _____ Other

Site reviewed by: _____ (SWCD or ODNR Representative) (Date)

If applicable, the Timber Harvest Plan was reviewed at the _____ meeting of the _____ (Date) SWCD Board of Supervisors.

_____ Approved

_____ Disapproved for the following reason(s): _____

Signed: _____ (Date)
Chair, SWCD Board of Supervisors, or ODNR
